Innovation, quality, and service in an all new lightweight, compact design.

USRX rescue helmets are engineered Bullard Tough™ for extreme search and rescue conditions. Featuring a streamlined design, USRX rescue helmets incorporate recommendations from USAR teams and other rescue professionals. The result is an integrated assembly of advanced materials and quality components that provide superior head protection, comfort, and proven long-lasting durability.

Features and Benefits

Compliance

- NFPA 1951-2001
- NFPA 1971-2000

Tough and Durable Protection. Bullard Tough.

The outer shell of the USRX is made of the same high-heat thermoplastic engineered in Bullard structural fire helmets and our full range of Thermal Imagers. Offered in seven colors: Red, White, Yellow, Black, Blue, Orange and Lime-yellow

Quick, Easy Sizing

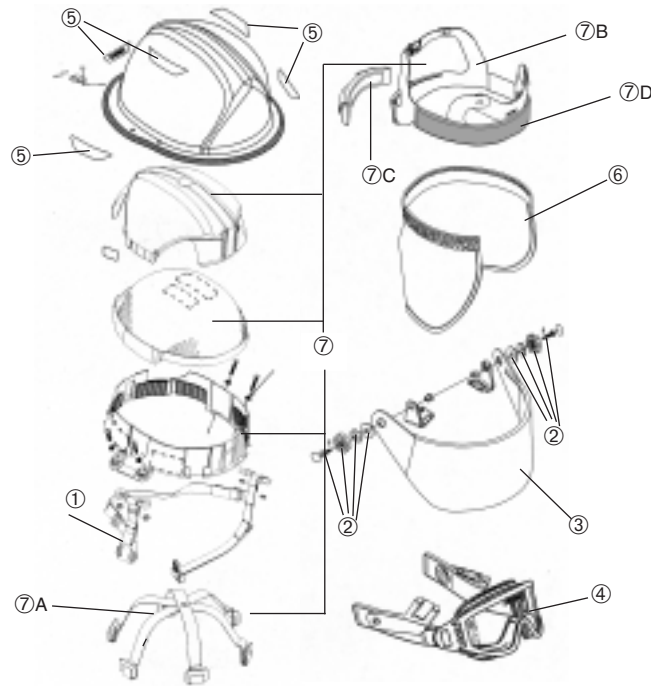

The Bullard Sure-Lock® ratchet headband offers both a quick-turn of the knob and a new, unique 3-position height adjuster for balance and comfort. The USRX is standard equipped with leather covered ratchet and a 3 point chin strap.

Eye Protection Made Easy

Bullard USRX Series helmets come standard with the all-new and innovative Quick-Attach Blade System. This system permits the wearer to simply press on or off either a blade-mounted faceshield or blade-mounted goggle in seconds. This flexibility gives the wearer the advantage of the right option for the right application without time consuming component changes. The USRX comes standard with ESS goggles.

Cost-Effective Maintenance

USRX helmets are designed from the start to make maintenance simple and cost effective. Fewer components, and the greatest cost effectiveness in the industry, enhance your long-term investment.

- ① R172 Nomex® chin strap with quick-release buckle
- ② R154 Faceshield mounting hardware kit, including quick-attach blades
- ③ R330 4" hard-coated PPC faceshield
