Firedome[®] FX and PX Structural Firefighter Helmets

Structural

**Bullard Comfort,
Quality and
Service in a
Lightweight
Design**

Firedome FX and PX helmets are designed to give firefighters the extra edge that tips the odds in their favor. Featuring contemporary styling, these helmets incorporate recommendations from veteran fire professionals from around the world. The result is an integrated assembly of advanced materials and quality components that provide outstanding head protection, superior comfort, long-lasting durability and proven on-the-job performance.

Features and Benefits

Superior Comfort

A low center of gravity provides both models with a balanced and stable fit, increasing overall comfort. Adding to the helmet's comfort and security is a natural leather ratchet pad.

Quick, Easy Sizing

Bullard's Sure-Lock[®] ratchet headband adjusts to the wearer's head with a quick turn of the knob. Additional adjustment points permit custom fit, personalized balance and interface with the SCBA.

Tough and Durable Protection

The outer shell of the PX is made of a high heat thermoplastic formulated especially for Bullard. This material provides greater impact and penetration resistance than fiberglass and resists degradation better after repeated high heat exposures.

The outer shell of the FX is made of fiberglass and is more resistant to chemical attack and more stable at extreme temperatures than those made of thermoplastic.

Both models have the color molded through the shell.

Cost-Effective Maintenance

Bullard helmets are designed from the start to make maintenance simple and cost effective. For example, the browpad can easily be removed and cleaned. Competitive helmets have the browpad sewn into the headband making for awkward cleaning and very expensive replacement.

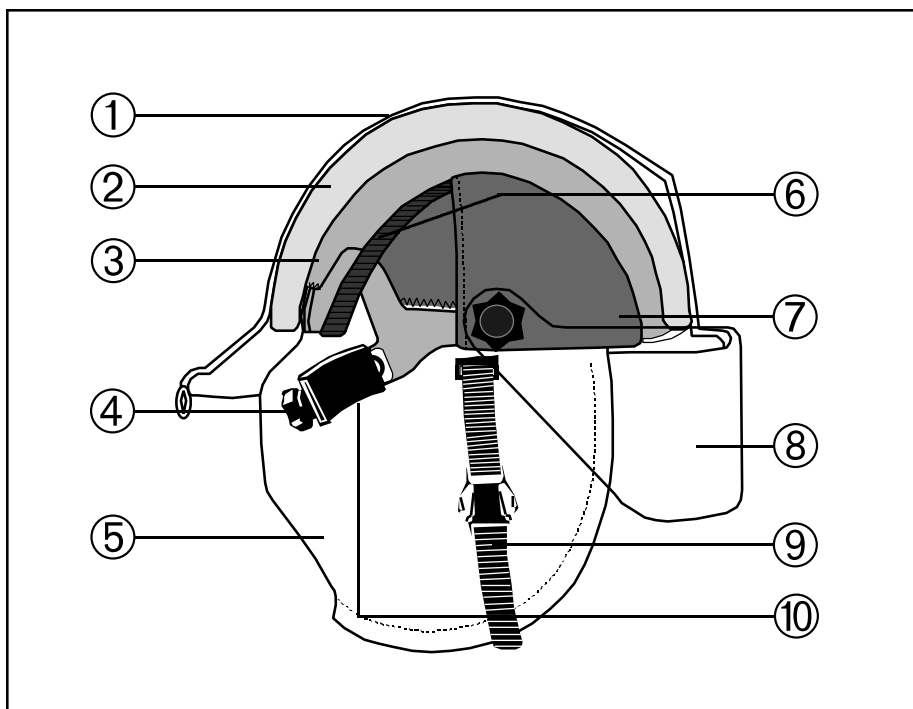

Maximum Visibility

PX and FX helmets feature 3M Scotchlite[®] striping which retains reflectivity to 500° F (260° C). That makes Scotchlite the toughest material available for helmet markings.

PX and FX helmets also feature the unique R330 optically-correct faceshield. The R330 eliminates distortion and reduces eye stress and fatigue.

Firedome® FX and PX Structural Firefighter Helmets

1. Thermoplastic or fiberglass outer shell
2. Urethane foam impact liner
3. Black inner shell
4. Sure-Lock® ratchet headband
5. Rip-Stop Nomex® ear/neck protector
6. Six-point crown strap assembly
7. Fire resistant, cotton brow pad
8. 4" (10.2 cm) optically correct faceshield
9. Nomex® chin strap with quick-release buckle and postman's slide fastener.
10. R160 leather ratchet cover

PX/FX helmets meet and exceed the performance specifications of NFPA 1971 - 1997 as certified by U. S. Testing.

ORDERING INFORMATION

Helmet shells come in seven standard colors: white, red, yellow, black, blue, orange, lime-yellow.
